AUTHOR INDEX TO VOLUME 8

This index lists, in alphabetical order, the names of authors of all articles, abstracts and letters. Full citation is provided under the first author only, with reference made from joint authors. Abstracts and letters are distinguished from articles by the following code: A = abstract, L = letter.

A

Alamo L, see López JR
Albers JW
see Alessi AG
see Burke JM
see Donofrio PD
see McGonagle TK
Albers JW, Donofrio PD, McGonagle TK: Sequential electrodiagnostic abnormalities in acute inflammatory demyelinating polyradiculoneuropathy, 528–539
Alderson MK, Ziter FA: Distal muscular dystrophy, 723-L
Aldrich MS, see Alessi AG
Alessi AG, Aldrich MS, Beck RW, Vanderzant CW, Olszewski C, Albers JW: Flash-evoked blink reflexes in adults with long-standing cortical blindness, 615-A
Al-Sulaiman A, Iyer V: The anti-myotonic effect of GABA: an in vitro study, 620-A
Altose MD, see DiMarco AF
Anciones B, see Cruz Martínez A
Andersen K
Comparison of sensory recording with surface and needle electrodes, 628-A
Surface recording of orthodromic sensory nerve action potentials in median and ulnar nerves in normal subjects, 402–408
Angelini C
see Pierobon-Bormioli S
see Salviati G
Angelini C: Multicenter trials in Duchenne muscular dystrophy: natural history and experience with calcium antagonist or branched chain amino acids, 474–477
Ansved T, see Larsson L
Armani M, see Pierobon-Bormioli S
Aro H, see Salonen V

B

Bach P, see Griggs RC
Bacq M, see Telerman-Toppet N
Bady B, see Chauplannaz G
Bahl JJ, see Czyzewski K
Bailey RO, see Koeppen AH
Baker JH: The development of central cores in both fiber types in tenotomized muscle, 115–119
Baker M, see Ravits J
Ball RD
see Barry DT
see Burke JM
Bandman E, see Shelton GD
Barry DT, Geiringer SR, Ball RD: Acoustic myography: a noninvasive monitor of motor unit fatigue, 189–194
Baran E, see Jaeger S
Baran E, Betz R, Steele H, Kresch E, Odland JD: Analysis of sensory function in established spinal cord injury, 618-A
Bardosi A, Zobel HJ: A new clamp for muscle and nerve biopsy, 725-L
Bauer SB, see Dyro FM
Beattie D, see Eberstein A
Beck RW, see Alessi AG
Benson RJJ, see Lentz TL
Benstead TJ, Kuntz NL, Miller RG: Electrophysiologic profile of Dejerine-Sottas disease (HMSN III), 625-A
Berchtold MW, see Müntener M
Berger AR, Logigian EL: Shahani BT: Direct evidence of reversible proximal conduction block in Guillain-Barré syndrome, 625-A
Bertorini TE: Requirements for adequate clinical trials in Duchenne's muscular dystrophy, 470–473
Bertorini TE, Igarashi M: Post-poliomyelitis muscle pseudohypertrophy, 644–649
Bescansa E, see Cruz Martínez A
Bess H, see Jaeger S
Betto R
see Pierobon-Bormioli S
see Salviati G
Betz R, see Baran E
Binkhorst RA, see Sinkeler SPT
Bodensteiner JB, see Mobley BA
Bokhari M, see Mobley BA
Bolhuis PA, de Zwart HJD, Ponne NJ, de Jong JMBV: Free-energy carriers in human cultured muscle cells, 22–26
Bosch EP, Yamada T, Kimura J: Somatosensory evoked potentials in motor neuron disease, 556–562
Boyd JC, see Levin R
Braheny SL, see Hughes RAC
Brin M, see Lange DJ
Brooke MH, see Griggs RC
Brooks BR
Summary and synthesis, 489–490
Test protocol development: further preliminary experience with the effects of TRH in ALS, 460–465
Brostoff S, see Hughes RAC
Brown BI, see Powell HC
Brown MJ, see Parry GJ
Bruns DE, see Levin R
Buchwald M, see Klip A
Burke JM, Ball RD, Albers JW: In vivo evaluation of muscle fatigue: effect upon the frequency-force relationship, 623-A
Busnardo B, see Salviati G

C

Cady EB, see Griffiths RD
Campbell D: Quasiexperimental approaches in therapeutic research, 483–485
Campbell WW Jr, Sahni KS, Leshner RT: Intraoperative electroneurography: management of ulnar neuropathy at the elbow, 612-A
Canal N, see Comi G
Cantón R, see Cruz Martínez A
Caputo C, see López JR
Cardinet GH III, see Shelton GD
Carfi J, Ma DM: Posterior interosseous syndrome revisited, 499–502
Carlson BM, see Faulkner JA
Ceri H, Roberts D: Endogenous lectins in normal and dystrophic muscle development, 710–713
Chassin SL, Little JW, DeLisa JA: Electrodiagnostic value of compound nerve

action potentials in the upper extremity, 616-A
Chauplannaz G, Brady B: The ischemic test in the diagnosis of ocular myasthenia gravis, 623-A
Cherington M, Happer I, Machanic B: Surgery for thoracic outlet syndrome may be hazardous to your health, 613-A
Cherry S, see Sellman MS
Chester J, see Lentz TL
Chirico-Post J, see Jabre JF
Chirico-Post J, Jabre JF: Single fiber electromyography (SFEMG) remission of a patient with myasthenia gravis, 620-A
CIDD Group, see Griggs RC
Clark KI, White TP: Morphology of stable muscle grafts of rats: effects of gender and muscle type, 99–104
Clark R, see Mobley BA
Clarke S, see Parry GJ
Clavería LE, see Cruz Martínez A
Clifford-Rose F, see Digby J
Coërs C, see Telerman-Toppet N
Cohen M, see Griggs RC
Coleman JC, see Yaar I
Comi G, Testa D, Cornelio F, Comola M, Canal N: Potassium depletion myopathy: a clinical and morphological study of six cases, 17–21
Comola M, see Comi G
Conneally PM, see Griggs RC
Cornblath DR, see Parry GJ
Cornblath DR, Pestronk A, Yee WC, Kuncl RW: Congenital myasthenia with increased numbers of acetylcholine receptors at neuromuscular junctions, 611-A
Cornelio F, see Comi G
Crisafulli CM, see Maccabee PJ
Cruz Martínez A, Anciones B, Ferrer MT, Díez Tejedor E, Pérez Conde MC, Bescansa E: Electrophysiologic study in benign human botulism type B, 580–585
Cruz Martínez A, Cantón R, Clavería LE: The Spanish toxic-oil syndrome: three years of evolution, 629-L
Cuddon P, see Shelton GD
Cummins KL, see Dorfman LJ
Currey KM, see Petajan JH
Czyzewski K, Stern LZ, Sadeh M, Bahl JJ: Altered rat skeletal muscle carnitine with age and after denervation, 34–37

D

Daanen HAM, see Sinkeler SPT
Damiani E, see Salviati G
de Jong JMBV, see Bolhuis PA
DeLisa JA, see Chassin SL
Denef J-F, see Ferriere G
Dengler R, Wolf W, Schubert M, Struppler A: Motor unit synchronization in physiologic and pathologic conditions: a study using computerized signal recognition, 627-A
de Visser M, Verbeeten B Jr: Computed tomography of the skeletal musculature in Becker-type muscular dystrophy and benign infantile spinal muscular atrophy, 435–444
DeVivo DC
see Sherbany AA
see Trevisan CP
De Zepetnek JT, see Mainwood GW
de Zwart HJD, see Bolhuis PA
Dhoot GK: Initiation of differentiation into skeletal muscle fiber types, 307–316
Di Benedetto M, see Redmond MD
Díez Tejedor E, see Cruz Martínez A
Digby J, Harrison R, Jehanli A, Lunt GG, Clifford-Rose F: Cultured rat spinal cord neurons: interaction with motor neuron disease immunoglobulins, 595–605
DiMarco AF, Kelling JS, DiMarco MS, Jacobs I, Shields R, Altose MD: The effects of inspiratory resistive training on respiratory muscle function in patients with muscular dystrophy, 284–290
DiMarco MS, see DiMarco AF
DiMauro S, see Trevisan CP
Doherty DJ: Ethical considerations in drug testing, 488–489
Donofrio PD
see Albers JW
see McGonagle TK
see Zea BL
Donofrio PD, Tandan R, Albers JW: Plasma exchange in chronic inflammatory demyelinating polyradiculoneuropathy, 321–327
Dorfman LJ, McGill KC, Cummins KL: Electrical properties of commercial concentric EMG electrodes, 1–8
Drachman DB
see Kuncl RW
see Pestronk A
Dubowitz V, see Heckmatt JZ
Dumas M, see Vallat JM
Duncan L, see Maltin CA
Dyro FM, Bauer SB, Khoshbin S, Krarup C: The changing neurologic lesion in myelodysplasia, 613-A
Dyro FM, Yalla SV: Refractoriness of periurethral striated muscle during voiding: clinical applications of changes in refractory period, 628-A

E

Eberstein A: Simultaneous measurement of muscle conduction velocity and EMG power spectrum changes during fatigue, 768–773
Eckardt VF, see Nix WA
Edwards RHT, see Griffiths RD
Eisen A, Odusote K, Hoirch M: Origin of far fields: the role of the peripheral volume conductor, 618-A
Eisen A, Odusote K, Paty D, Li D, Eisen K: Absence, not slowing, of somatosensory evoked potential (SEP) components typifies multiple sclerosis as revealed through a magnetic resonance imaging-SEP correlative study, 621-A
Eisen K, see Eisen A
Elder B, see Klip A
Emerson RG, see Sherbany AA
Emser W, see Schmidt H
Eng DL, see Waxman SG
Erlandson RF, see Joynt RL
Erlandson RF, Rourke M, Joynt RL: Analysis of the low-frequency segment of the Fast Fourier Transform of simulated electromyographic interference patterns, 626-A

F

Fahn S, see Lange DJ
Faulkner JA, Carlson BM: Contractile properties of standard and nerve-intact muscle grafts in the rat, 413–418
Feeback DL, see Mobley BA
Feit H, Kawai M, Schulman MI: Stiffness and contractile properties of avian normal and dystrophic muscle bundles as measured by sinusoidal length perturbations, 503–510
Feit H: Collagen in chemically skinned, extracted myofibers, 806-L
Fenichel GM, see Griggs RC
Ferrer MT, see Cruz Martínez A
Ferriere G, Denef J-F, Rodriguez J, Guzzeta F: Morphometric studies of normal sural nerves in children, 697–704
Fine EJ, Wongjirad C:
The fallacy of temperature correction in carpal tunnel syndrome, 628-A
The ulnar flexion maneuver, 612-A
Finneson LR, see Kelly JJ
Fisher MA
F wave/M amplitudes: comparison in patients with polyneuropathies and spastic-hyperreflexia, 614-A
F waves, 71-L
see Perlik SJ
Forno LS, see LeWitt PA
Forsum U, see Olsson T
Fox JG, Hallett M, Nicolosi R, Landis DMD, Pezeshkpour G: Controlled study of alcohol toxicity on peripheral nerve in primates, 611-A
Francis ME, see Tahmoush AJ
Fressinaud C, see Vallat JM
Frith RW, Litchy WJ: Electrophysiologic abnormalities of peripheral nerves in patients with cervical radiculopathy, 613-A
Fujita T, see Kamakura K
Fukuoka T, see Madriaga EP

G

Gambke B, see Hoffman RK
Gamez GL, see Madriaga EP
Geiringer SR, see Barry DT
Gilchrist JM, Sanders DB: The double-step technique of repetitive nerve stimulation, 624-A
Glass CA, Walker C, Strohman RC: PC12 cells stimulate slow-myosin light chain 2 synthesis in chick breast muscle culture, 372–379
Graziano H, see Soliven B
Green A, see Soliven B
Griffiths RD, Cady EB, Edwards RHT, Wilkie DR: Muscle energy metabolism in Duchenne dystrophy studied by ^{31}P NMR: controlled trials show no effect of allopurinol or ribose, 760–767
Griggs RC, Mendell JR, Brooke MH,

Fenichel GM, Miller JP, Province M, Moxley RT III, Huntzinger D, Vaughn A, Cohen M, Conneally PM, Bach P, CIDD Group: Clinical investigation in Duchenne dystrophy: V. Use of creatine kinase and pyruvate kinase in carrier detection, 60–67
Grimaud C, see Jammes Y
Grinstein S, see Klip A
Gulati AK, Zalewski AA: Basement membrane component changes in nerve allografts and isografts, 280–283
Gunther JS, Letinsky MS: Structure of motor nerve terminals in chickens with hereditary muscular dystrophy, 568–575
Gutierrez A, see Gutmann L
Gutmann L, see Miller RG
Gutmann L, Gutierrez A, Riggs JE: Median-ulnar communications: sensitive indicator in mild carpal tunnel syndrome, 616-A
Guzzeta F, see Ferriere G

H

Haas R, see Powell HC
Haimann C, see Mallart A
Hall CL, see Powell HC
Haller RG: Experimental acute alcoholic myopathy-a histochemical study, 195–203
Hallett M
see Fox JG
see Ravits J
see Wilkins DE
Hans MB, see Koeppen AH
Hanson RM, see Maccabee PJ
Happer I, see Cherington M
Harrison R, see Digby J
Harrold S, see Neville HE
Hawrot E, see Lentz TL
Heckmatt JZ, Dubowitz V: Diagnostic advantage of needle muscle biopsy and ultrasound imaging in the detection of focal pathology in a girl with limb girdle dystrophy, 705–709
Heiman-Patterson TD
see Jones R
see Tahmoush AJ
Heizmann CW, see Müntener M
Hening W, Saines N, Zablow L, Lovelace RE: Localization of source by back-averaging techniques in progressive idiopathic and acquired myoclonus, 615-A
Henriksson KG, see Olsson T
Hilton-Brown P, Stålberg E, Trontelj J, Mihelin M: Causes of the increased fiber density in muscular dystrophies studied with single fiber EMG during electrical stimulation, 383–388
Hizawa K, see Kagawa N
Hoffman RK, Gambke B, Stephenson LW, Rubinstein NA: Myosin transitions in chronic stimulation do not involve developmental isozymes, 796–805
Hogan GR, see Wu J-S
Hoirch M, see Eisen A
Holers VM, see Rosenberg NL
Hooper D, see Miller RG
Hopf HC, see Schröder JM
Höpfel D, see Lehmann-Horn F
Horowitz SH: Hemifacial spasm and myokymia of central origin, 622-A
Howard JF Jr, see Massey JM
Hughes RAC, Powell HC, Braheny SL, Brostoff S: Endoneurial injection of antisera to myelin antigens, 516–522
Hugon J
see Ludolph A
see Vallat JM
Hugon J, Ludolph A, Roy DN, Spencer PS: Electrophysiologic characterization of chronic IDPN axonopathy in primates, 617-A
Huntzinger D, see Griggs RC
Hynninen P, see Lang HA

I

Igarashi M, see Bertorini TE
Igata A, see Madriaga EP
Ishiura S, see Kamakura K
Iyer V, see Al-Sulaiman A

J

Jabre JF, see Chirico-Post J
Jabre JF, Chirico-Post J: Stimulation single fiber electromyography in patients with myasthenia gravis, 619-A
Jabre JF, Stalberg EV: Single fiber study of the flexor carpi radialis H reflex, 615-A
Jacobs I, see DiMarco AF
Jacobus DP: Organizing clinical trials, 466–469
Jaeger S, Baran E, Mandel S, Whitenack S, Kresch E, Bess H, Odland JD: Mid-latency somatosensory evoked potential abnormalities in proximal sensory neuropathies, 618-A
Jammes Y, Pouget J, Grimaud C, Serratrice G: Pulmonary function and electromyographic study of respiratory muscles in myotonic dystrophy, 586–594
Jäntti V, see Lang HA
Jaryszak DL, see Schultz E
Jasch LG, Moase EH: Evidence for the identities of five proteins decreased in skeletal muscle of dystrophic mice, 389–401
Jaspan J, see Soliven B
Jehanli A, see Digby J
Jones R, Heiman-Patterson TD, Tahmoush AJ: Trichinosis appearing as an acute inflammatory myopathy, 619-A
Joosten EMG, see Sinkeler SPT
Joynt RL, see Erlandson RF
Joynt RL, Erlandson RF: Analysis of the low-frequency segment of the Fast Fourier Transform of human biceps interference patterns, 627-A

K

Kagawa N, Hizawa K: Immunohistochemical study of myoglobulin in neuromuscular diseases, 9–16
Kalimo H, see Salonen V
Kamakura K, Ishiura S, Fujita T, Nonaka I, Sugita H: Localization of calcium-activated neutral protease (CANP) in the peripheral nerve, 380–382
Kawai M, see Feit H
Kelling JS, see DiMarco AF
Kelly JJ Jr: Peripheral neuropathies associated with monoclonal proteins: a clinical review, 138–150
Kelly JJ, Munsat TL, Finneson LR: Electrophysiologic testing in amyotrophic lateral sclerosis therapeutic trials, 614-A
Kennaugh RC, see Rosenberg NL
Khoshbin S, see Dyro FM
Khoubesserian P, see Telerman-Toppet N
Kihlström M, see Salminen A
Kilgo GR, see Walker FO
Kim YI: Passive transfer of the Lambert-Eaton myasthenic syndrome: neuromuscular transmission in mice injected with plasma, 162–172
Kimura J
F waves—a reply, 72-L
see Bosch EP
Kiprov D, see Miller RG
Kishimoto Y, see Kuncl RW
Klareskog L, see Olsson T
Klimt CR: Epidemiologic issues on drug trials, 478–479
Klip A, Elder B, Ruiz-Funes HP, Buchwald M, Grinstein S: The free cytoplasmic Ca^{2+} levels in Duchenne muscular dystrophy lymphocytes, 317–320
Klug G, Reichmann H, Pette D: Decreased parvalbumin contents in skeletal muscles of C57BL/6J(dy^{2J}/dy^{2J}) dystrophic mice, 576–579
Kocsis JD, see Waxman SG
Koeppen AH, Mitzen EJ, Hans MB, Peng S, Bailey RO: Familial amyloid polyneuropathy, 733–749
Kotzin BL, see Rosenberg NL
Krämer G, see Nix WA
Krämer KG, see Schröder JM
Krarup C, see Dyro FM
Krendel DA, Sanders DB, Massey JM: Single fiber electromyography in chronic progressive external ophthalmoplegia, 624-A
Kresch E
see Baran E
see Jaeger S
Kuncl RW, see Cornblath DR
Kuncl RW, Drachman DB, Kishimoto Y: Phospholipid methylation in skeletal muscle membranes, 426–434
Kuntz NL, see Benstead TJ
Küther G, see Lehmann-Horn F
Kuusela V, see Lang HA

L

Lacy JR, see Rosenberg NL
Landis DMD, see Fox JG
Lang HA, Puusa A, Hynninen P, Kuusela V, Jäntti V, Sillanpää M: Evolution of nerve conduction velocity in later childhood and adolescence, 38–43
Lang W, see Miller RG
Lange DJ, Smith T, Warner C, Lovelace RE: The use of quantitative and single

fiber electromyography in diseases of the anterior horn cell, 619-A
Lange DJ, Warner C, Brin M, List T, Fahn S, Lovelace RE: Botulinum toxin therapy: distant effects on neuromuscular transmission, 624-A
Larrson L, Ansved T: Effects of long-term physical training and detraining on enzyme histochemical and functional skeletal muscle characteristics in man, 714–722
Layzer RB, see Miller RG
Ledezma D, see López JR
Lehmann-Horn F, Höpfel D, Rüdel R, Ricker K, Küther G: In vivo P-NMR spectroscopy: muscle energy exchange in paramyotonia patients, 606–610
Lehto M, see Salonen V
Lentz TL, Chester J, Benson RJJ, Hawrot E, Tignor GH, Smith AL: Rabies virus binding to cellular membranes measured by enzyme immunoassay, 336–345
Leonard JA Jr, see Zea BL
Leshner RT, see Campbell WW Jr
Letinsky MS, see Gunther JS
Levin R, Pascuzzi RM, Bruns DE, Boyd JC, Toly TM, Phillips LH II: How traumatic is the needle EMG examination? The magnitude and time course of creatine kinase elevation following concentric needle EMG, 620-A
Levine SR, see McGonagle TK
Levinson SR, see Martin AR
Lewis LN, Mezei C: Activity of 2′3′-cyclic-nucleotide 3′-phosphodiesterase and content of PO protein in the peripheral nervous system of the dystrophic mouse and chicken, 120–124
Lewis NJ
Background and activities of MDA's Task Force on Drug Development (TFDD), 454–457
see Wolf S
Lewis RA, see Miller RG
LeWitt PA, Forno LS: Peripheral neuropathy following amitriptyline overdose, 723-L
Li D, see Eisen A
Lippert R, see Miller RG
List T, see Lange DJ
Litchy WJ, see Frith RW
Little JW, see Chassin SL
Logigian EL, see Berger AR
López JR, Alamo L, Caputo C, Wikinski J, Ledezma D: Intracellular ionized calcium concentration in muscles from humans with malignant hyperthermia, 355–358
Lovelace RE
see Hening W
see Lange DJ
see Sherbany AA
Low PA: Endoneurial potassium is increased and enhances spontaneous activity in regenerating mammalian nerve fibers-implications for neuropathic positive symptoms, 27–33
Ludolph A, see Hugon J
Ludolph A, Hugon J, Roy DN, Spencer PS: Primate model of human lathyrism: electrophysiologic study, 611-A
Lunt GG, see Digby J

M

Ma DM, see Carfi J
Maccabee PJ, Hanson RM, Crisafulli CM, Rial JC: Further advantages of measuring proximal and distal palmar conduction in patients with suspected carpal tunnel syndrome (CTS), 616-A
Machanic B, see Cherington M
Madriaga EP, Osame M, Fukuoka T, Sato E, Gamez GL, Igata A: Morphometric analysis of intramuscular nerves, 241–244
Mainwood GW, De Zepetnek JT: Post-tetanic responses in creatine-depleted rat EDL muscle, 774–782
Mallart A, Haimann C: Differential effects of α-latrotoxin on mouse nerve endings and fibers, 151–157
Maltin CA, Duncan L, Wilson AB: Rat diaphragm: changes in muscle fiber type frequency with age, 211–216
Mandel S, see Jaeger S
Margreth A, see Salviati G
Martin AR, Levinson SR: Contribution of the Na^+-K^+ pump to membrane potential in familial periodic paralysis, 359–362
Marsh B, see Palmer JB
Maselli R, see Soliven B
Massey JM, see Krendel DA
Massey JM, Sanders DB, Howard JR Jr: Use of single fiber electromyography to predict the course of ocular myasthenia, 624-A
Matloub HS, see Wertsch JJ
Mayer RF, see Sellman MS
McGill KC, see Dorfman LJ
McGonagle TK, see Albers JW
McGonagle TK, Levine SR, Donofrio PD, Albers JW: The clinical spectra of patients with electrodiagnostic evidence of polyradiculopathy without neuropathy, 615-A
Mendell JR, see Griggs RC
Meyers DG, see Streib EW
Mezei C, see Lewis LN
Mihelin M, see Hilton-Brown P
Miller JP
Use of diagnostic registries and data bases, 486–487
see Griggs RC
Miller RG
see Benstead TJ
see Milner-Brown HS
Miller RG, Gutmann L, Lewis RA, Sumner AJ: Acquired versus familial demyelinative neuropathies in children, 205–210
Miller RG, Milner-Brown S, Layzer RB, Hooper D, Weiner M: A new method of studying human muscle fatigue: correlation of force/EMG and nuclear magnetic resonance spectroscopy, 623-A
Miller RG, Parry G, Lang W, Lippert R, Kiprov D: AIDS-related inflammatory polyradiculoneuropathy: prediction of response to plasma exchange with electrophysiologic testing, 626-A
Millette TJ, Subramony SH, Wee AS, Mitsumoto H: Chronic active hepatitis and vasculitic neuropathy, 617-A
Milner Brown S, see Miller RG
Milner-Brown HS, Miller RG: Methods of quantifying human muscle strength, endurance, and fatigue, 622-A
Mira, J-C, see Pecot-Dechavassine M
Mitsumoto H
Axonal regeneration in wobbler motor neuron disease: quantitative histologic and axonal transport studies, 44–51
see Millette TJ
Mitz AR, see Yaar I
Mitzen EJ, see Koeppen AH
Moase EH, see Jasch LG

SUBJECT INDEX TO VOLUME 8

This index gives the first author (in parentheses) and the first page of the article, abstract, or letter in which the indexed subject occurs. The reader is referred to the author index for the full title and coauthors, where appropriate, of the piece. Abstracts and letters are distinguished from articles by the following code: A = abstract, L = letter.

A

Acetylcholine receptor
  congenital myasthenia syndrome (Cornblath) 611-A
  myasthenia gravis (Pestronk) 245
  polymyositis (Pestronk) 233
Aging
  rat diaphragm (Maltin) 211
Amyotrophic lateral sclerosis
  electrophysiologic testing in therapeutic trials (Kelly) 614-A
  F-waves (Petajan) 690
  hypoglossal nerve-electrodiagnostic evaluation (Redmond) 627-A
  serum and cultured motor neurons (Digby) 595
  TRH and SFEMG studies (Tahmoush) 613-A
Axonal transport
  wobbler mice (Mitsumoto) 44

B

Book Review
  Muscle Strength Testing: A System Based on Mechanics (Smidt) 726
Botulism
  esophageal motor dysfunction (Nix) 791
  type B in humans (Cruz Martínez) 580

C

Carpal tunnel syndrome
  median-ulnar communications (Gutmann) 616-A
  proximal and distal palmar conduction measurement (Maccabee) 616-A
  temperature correction (Fine) 628-A
Cell membranes
  rabies virus binding (Lentz) 336
Clinical trials
  neuromuscular disease (Wolf) 453
Creatine kinase
  in cultured muscle cells (Bolhuis) 22
Creatine phosphate
  in cultured muscle cells (Bolhuis) 22

E

Electromyography
  analysis of Fast Fourier Transform interference patterns (Erlandson) 626-A
  concentric needle electrodes (Dorfman) 1
  concentric needle EMG (Levin) 620-A
  Fast Fourier Transform interference patterns of human biceps (Joynt) 627-A
  fatigue in interference patterns in myasthenia gravis (Yaar) 328
  periurethral striated muscle (Dyro) 628-A
  pharynx (Palmer) 627-A
  power spectrum changes in fatigue (Eberstein) 768
  pulmonary function of respiratory muscle in myotonic dystrophy (Jammes) 586
  syringomyelia (Veilleux) 621-A
Electromyography, single fiber
  anterior horn cell disease (Lange) 619-A
  chronic progressive external ophthalmoplegia (Krendel) 624-A
  fiber density in muscular dystrophy (Hilton-Brown) 383
  flexor carpi radialis H reflex (Jabre) 615-A
  in ALS and TRH (Tahmoush) 613-A
  myasthenia gravis (Jabre) 619-A
  ocular myasthenia gravis (Massey) 624-A
  remission in myasthenia gravis (Chirico-Post) 620-A
Electrophysiological studies
  congenital folate malabsorption (Sherbany) 616-A
  Dejerine-Sottas disease (Benstead) 625-A
Evoked potentials
  in lower limb nerve lesions (Synek) 511
  origin of far fields (Eisen) 618-A
  phase-shift free (Yaar) 619-A
Evoked potentials, somatosensory
  in spinal cord injury (Baran) 618-A
  motor neuron disease (Bosch) 556
  multiple sclerosis (Eisen) 621-A
  myelopathic cervical spondylosis (Perlik) 618-A
  proximal sensory neuropathies (Jaeger) 618-A
  syringomyelia (Veilleux) 621-A

F

Fatigue
  acoustic myography (Barry) 189
F-waves
  neurogenic atrophy (Petajan) 690
  origin in a select group of motoneurons (Fisher) 71-L; (Kimura) 72-L
  ratio to maximum evoked motor response amplitudes (Fisher) 614-A

H

Hemifacial spasm
  electrophysiological studies (Horowitz) 622-A
  electrophysiology of the facial nerve (Nielsen) 545
H reflex
  flexor carpi radialis (Jabre) 615-A

L

Lambert-Eaton myasthenic syndrome
  passive transfer (Kim) 162
Lymphoid irradiation
  in chronic demyelinating inflammatory polyneuropathy (Rosenberg) 223

M

Malignant hyperthermia
  intracellular ionized calcium concentration (Lopez) 355
Mitral valve prolapse
  myotonic dystrophy (Streib) 650

Motor neuron
cultured rat spinal cord cells (Digby) 595
Motor neuron disease
axonal regeneration in wobbler mice (Mitsumoto) 44
somatosensory evoked potentials (Bosch) 556
Motor unit fatigue
acoustic myography (Barry) 189
Motor units
audiogenic startle reflex (Wilkins) 621-A
measurements of action potential duration (Nandedkar) 626-A
spontaneous reticular myoclonus (Ravits) 621-A
synchronization study using computerized signal recognition (Dengler) 627-A
Muscle
β-oxidation in myopathic carnitine deficiency (Trevisan) 672
carnitine in denervation (Czyzewski) 34
central core development in tenotomy (Baker) 115
chronic stimulation, myosin transitions (Hoffman) 796
clamp for muscle biopsy (Bardosi) 725-L
collagen and fibronectin in denervation atrophy (Salonen) 125
conduction velocity in fatigue (Eberstein) 768
energy carriers in cultured muscle cells (Bolhuis) 22
enzyme release from frog muscle (Suarez-Kurtz) 158
exercise (Salminen) 269
freezing for cryostat sectioning (Wu) 664
grafts (Clark) 99
hyperthyroid (Salviati) 363
hypothyroid (Salviati) 363
immobilization (Zuurveld) 750
intracellular ionized calcium concentration in malignant hyperthermia (Lopez) 355
isaxonine and reinnervation (Pecot-Dechavassine) 105
ischemic exercise (Sinkeler) 523
lysosomal changes in exercise (Salminen) 269
myodystrophic mice (Mobley) 93
myoglobin (Kagawa) 9
parvalbumin in cross-reinnervated and denervated muscle (Müntener) 132
post-poliomyelitis muscle pseudohypertrophy (Bertorini) 644
protein degradation in Duchenne muscular dystrophy patients (Neville) 253
quantifying strength, endurance, and fatigue (Milner-Brown) 622-A
regeneration (Schmidt) 633
relationship of LA and NH_3 (Sinkeler) 523
satellite cells and injury (Schultz) 217
training (Larsson) 714
tubular aggregates and calcium storage (Salviati) 299
tubular aggregates due to ethchlorvynol (Petajan) 620-A
tubular aggregates in familial disease (Pierobon-Bormioli) 291
Muscle cramps
fiber type predominance (Telerman-Toppet) 563
Muscle denervation
carnitine (Czyzewski) 34
parvalbumin (Müntener) 132
Muscle fatigue
frequency-force relationship (Burke) 623-A
nuclear magnetic resonance spectroscopy (Miller) 623-A
Muscle fibers
calcium effects on myofibers (Zuurveld) 750
Muscle fiber types
differentiation into skeletal muscle fiber types (Dhoot) 307
hypothyroidism (Sugie) 654
muscle cramp and exertional myalgia (Telerman-Toppet) 563
neural control (Pette) 676
rat diaphragm and age (Maltin) 211
Muscle fiber type-specific
in canine eosinophilic myositis (Shelton) 783
Muscle grafts
contractile properties in nerve-intact grafts (Faulkner) 413
Muscle membranes
phospholipid methylation (Kuncl) 426
Muscle regeneration
satellite cells (Schultz) 217
Muscle tenotomy
central core development (Baker) 115
Muscular dystrophy
collagen in chemically skinned, extracted myofibers (Feit) 806-L
distal (Alderson) 723-L
fiber density studied with single fiber EMG (Hilton-Brown) 383
lectins in muscle development (Ceri) 710
myodystrophic mouse (Mobley) 93
myofibrillar ATPase in myodystrophic mice (Mobley) 93
respiratory training (DiMarco) 284
Muscular dystrophy-avian
neuromuscular junction (Gunther) 568
peripheral nervous system myelin (Lewis) 120
stiffness of muscle bundles (Feit) 503
Muscular dystrophy-Becker
computed tomography (de Visser) 435
Muscular dystrophy-Duchenne
calcium in lymphocytes (Klip) 317
carrier detection (Griggs) 60
creatine kinase and pyruvate kinase in carrier detection (Griggs) 60
energy metabolism (Griffiths) 768
lymphocyte cytoplasmic Ca^{2+} levels (Klip) 317
protein degradation in muscle (Neville) 253
Muscular dystrophy-limb girdle
needle biopsy (Heckmatt) 705
ultrasound imaging (Heckmatt) 705
Muscular dystrophy-mouse
myosin alterations (Jasch) 389
parvalbumin content (Klug) 576
peripheral nervous system myelin (Lewis) 120
Muscular dystrophy-myotonic
mitral valve prolapse (Streib) 650
pulmonary function and EMG study of respiratory muscles (Jammes) 586
Myasthenia gravis
acetylcholine receptors (Pestronk) 245
fatigue in EMG interference patterns (Yaar) 328
ocular, diagnosis by ischemic test (Chauplannaz) 623-A
ocular, single fiber EMG (Massey) 624-A
single fiber EMG (Jabre) 619-A
single fiber EMG remission (Chirico-Post) 620-A
Myasthenia syndrome
AChRs at neuromuscular junctions (Cornblath) 611-A
passive transfer (Kim) 162
Myoclonus
localization (Hening) 615-A
Myoglobin
immunohistochemical study in neuromuscular disease (Kagawa) 9
Myopathy
acute alcoholic (Haller) 195
carnitine deficiency (Trevisan) 672
centronuclear myopathy associated with cataract and electrical myotonia (Vallat) 808-L
creatine depletion (Mainwood) 774
glycogenosis type III, nerve involvement (Powell) 667
granular nuclear inclusion body disease (Schröder) 52
potassium depletion (Comi) 17
trichinosis (Jones) 619-A
Myosin
antibodies and muscle differentiation (Dhoot) 307
chronic stimulation of muscle (Hoffman) 796
Myosin light chains
stimulated by PC12 cells (Glass) 372
Myotonia
effect of GABA (Al-Sulaiman) 620-A
Myotonia congenita
electrophysiological manifestations (Wong) 622-A

N

Nerve
α-latrotoxin effects (Mallart) 151
basement membrane in nerve allografts and isografts (Gulati) 280
calcium-activated neutral protease (Kamakura) 380
cervical radiculopathy (Frith) 613-A
clamp for nerve biopsy (Bardosi) 725-L
conduction block and pure motor neuropathy (Parry) 617-A
endoneurial injection of antisera (Hughes) 516
endoneurial potassium in regenerating peripheral nerve fibers (Low) 27
ephaptic transmission in hemifacial spasm (Nielsen) 545
grafts (Gulati) 280
hemifacial spasm and myokymia (Horowitz) 622-A
intramuscular nerves (Madriaga) 241

ligature-induced injury (Waxman) 85
myelin chemistry in dystrophic mouse and nerve (Lewis) 120
repetitive stimulation (Gilchrist) 624-A
sprouting (Pecot-Dechavassine) 105
sural nerve in children (Ferriere) 697
type III glycogenosis (Powell) 667
Nerve conduction
acute inflammatory polyneuropathy (Sorenson) 626-A
AIDS-related inflammatory polyradiculoneuropathy (Miller) 626-A
compound nerve action potentials in upper extremity (Chassin) 616-A
in acute inflammatory polyneuropathy (Albers) 528
sensory (Andersen) 628-A
skin temperature measurements (Walker) 807-L
surface versus needle electrodes (Andersen) 628-A
ulnar flexion maneuver (Fine) 612-A
Nerve conduction block
acute ischemia (Parry) 409
by ligature (Waxman) 85
Nerve conduction velocity
children (Lang) 38
development with age (Lang) 38
Nerve demyelination
intraneural injection of antisera (Hughes) 516
Nerve entrapment
median (Maccabee) 616-A
median-ulnar communications (Gutmann) 616-A
posterior interosseous syndrome (Carfi) 499
pseudo-anterior interosseous nerve syndrome (Wertsch) 68
thoracic outlet syndrome during thoracic surgery (Wilbourn) 612-A
Nerve entrapment median
carpal tunnel syndrome (Fine) 628-A
Nerve sensory
surface recording of orthodromic sensory nerve action potentials (Andersen) 402
Neuromuscular disease
clinical trials (Wolf) 453
myoglobin immunohistochemistry (Kagawa) 9
tubular aggregates (Pierobon-Bormioli) 291
Neuromuscular junction
α-latrotoxin (Mallart) 151
Neuromuscular transmission
botulinum toxin therapy (Lange) 624-A
Neuropathy
acute inflammatory polyneuropathy and electrophysiology (Albers) 528
acute inflammatory, reversible proximal conduction block (Berger) 625-A
alcoholic in primates (Fox) 611-A
alcoholic polyneuropathy (Shields) 183
amiodarone (Zea) 612-A
amitriptyline overdose (LeWitt) 723-L
chronic demyelinating inflammatory polyneuropathy treated by total lymphoid irradiation (Rosenberg) 223
chronic inflammatory demyelinating neuropathy treated by plasmapheresis (Donofrio) 321
demyelinative in children (Miller) 205
diabetic, sympathetic skin response (Soliven) 614-A
familial amyloid polyneuropathy (Koeppen) 733
hepatitis and vasculitis (Millette) 617-A
HMSN III (Benstead) 625-A
IDPN, in primates (Hugon) 617-A
intraoperative electroneurography (Campbell) 612-A
lathyrism in primates (Ludolph) 611-A
monoclonal proteins (Kelly) 138
mononeuropathy multiplex (Parry) 493
pure motor conduction neuropathy with multifocal conduction block (Parry) 617-A
Spanish toxic oil syndrome (Cruz Martínez) 630-L
tomaculous (Sellman) 625-A
vasculitis (Parry) 493

P

Paramyotonia congenita
electrophysiological studies (Streib) 622-A
phosphorus nuclear magnetic resonance spectroscopy (Lehmann-Horn) 606
treatment with Tocainamide (Streib) 622-A
Periodic paralysis
contribution of electrogenic pump to membrane potential (Martin) 359
Na^+-K^+ pump (Martin) 359
Plasmapheresis
chronic demyelinating neuropathy (Donofrio) 321
Polyaminoacids
muscle enzyme release (Suarez-Kurtz) 158
Polymyositis
acetylcholine receptors (Pestronk) 233
eosinophilic in dogs (Shelton) 783
immunology (Olsson) 419
Post-polio syndrome
muscle pseudohypertrophy (Bertorini) 644
Protamine
muscle enzyme release (Suarez-Kurtz) 158

R

Radiculopathy
cervical (Frith) 613-A
versus neuropathy (McGonagle) 615-A
Reflex
blink (Alessi) 615-A

S

Spinal muscular atrophy
computed tomography (de Visser) 435
Werdnig-Hoffmann disease, respiratory distress (Schapira) 661

T

Thoracic outlet syndrome
surgery (Cherington) 613-A

U

Urodynamics
in myelodysplasia (Dyro) 613-A
